## **DETAIL OF ACTION**

1. Claim 1 stand rejected under 35 U.S.C. 102(b) as being clearly anticipated by Detroye (4,748,581)

Detroye discloses a square root extraction circuit having first to mth digit calculating portion (S1-S4, see figure 2), each include a plurality of adders (FA, see figure 1) connected in series as claimed. The computation of the square root data as shown in figures 1 and 2 of Detroye can be seen as being performed by only additions by the plurality of full adders (FA), and the EXOR gates (EO1) are used to provide inputs  $q_i \hat{q}_j$  as that of the present invention to the adders.

2. Applicant's arguments filed 09-02-2003 have been fully considered but they are not persuasive because the computation of the square root data as shown in figures 1 and 2 of Detroye can be seen as being performed by only additions by the plurality of full adders (FA), and the EXOR gates (EO1) are used to provide inputs  $q_i \hat{q}_j$  as that of the present invention to the adders. The present specification although does not disclose EXOR gates, the claimed invention as disclosed must include some logic means for providing EXOR inputs  $q_i \hat{q}_j$  to the adders as that of Detroye.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
